

Time is money

"A good sporting performance is even better with good support."
 Owner Dietmar Møgenburg (Germany)

PATENTED

The patented Boflex system, with built-in shock absorption in the parquet, is as well suited to children's activities as it is to withstanding the weight of a heavy grandstand.

EASY, FAST AND SECURE INSTALLATION

Boflex can be installed directly on top of the existing floor or subfloor. The subfloor must be stable, self-supporting and level. The maximum permitted deviation is 2 mm per 2 metre radius. Boen Sport has developed special installation equipment that ensures the correct application of adhesive and effective installation of the floor.

RENOVATION

Due to its extremely low building height it is well suited to renovation purposes. The patented yielding system works very well when installed on old sports flooring, whether it be point or surface elastic.

ENVIRONMENT

The product's main components come from pure and renewable timber. The adhesive and lacquer, once hardened, are not harmful to nature. While the product lasts for a lifetime it can be maintained in such a way that the wood's natural appearance and qualities are preserved.

Due to its extremely low building height it is well suited to renovation purposes. The patented yielding system works very well when installed on old sports flooring, whether it be point or surface elastic.

Directly installed on a subfloor e.g. concrete. Shock absorption: 61%

Directly installed on an old point elastic covering. Installed on a 7 + 2 mm point elastic floor. Shock absorption: 60%

Directly installed on an old surface elastic floor, solid wood. Double joists, 22 mm solid wood. Shock absorption: 69%

Made to be used - easy to maintain

BOFLEX PROVIDES IDENTICAL CONDITIONS FOR DIFFERENT GENERATIONS. THE UNIQUE BOFLEX PATENT IS A GUARANTEE OF HIGH-QUALITY FLOORING FOR THE ATHLETES.

FITNESS FLOOR • Boflex

Wood, for a pleasant atmosphere

IF YOU CHOOSE A HARDWOOD FLOOR, YOU GET THE WOOD'S NATURAL RADIANCE IN AEROBICS STUDIOS, TRAINING STUDIOS, ETC. AND A PLEASANT ATMOSPHERE THAT PEOPLE ENJOY. IT ADDS CHARACTER, COMFORT AND WARMTH TO THE STUDIOS. WOOD IS A NATURAL PRODUCT THAT IS ECO-FRIENDLY AND WHICH IS EASY TO INSTALL AND MAINTAIN.

BOEN LACQUER

During the production process, 6 coats of UV-hardened lacquer are applied to the Boflex Sports Floor. We recommend a further coat of Bona Sportive Finish after installation.

BOFLEX

Can be delivered in

Ash

Oak

Maple

Jatoba

Beech

Energetic flexibility

BOFLEX IS OUR MOST POPULAR HARDWOOD SYSTEM FOR HEAVY-USE AEROBIC FACILITIES. WHY? BECAUSE OF ITS SAFETY, COMFORT, FLEXIBILITY AND PERFORMANCE!

"The ultimate aerobic floor!"

Managing Partner of World's Gym, Mike McNeese

The feather feeling

TO BE HONEST:
BOFLEX DOESN'T MAKE YOU FLY, BUT IT WILL
GIVE YOU A SOFT LANDING

*"Boflex leads to more effective training
and prevents injury."*

Physiotherapist Ole Petter Ramfjord (Norway)

The majority of experts state that indoor sports flooring properties should be tested for shock absorption using a person weighing approximately 75 kg. While in the process of developing the Boflex Sports Floor, it was always our top priority that Boflex should work well for all user groups, including children. Tests (carried out by The Norwegian Institute of Building Research) show unequivocally that Boflex matches all of its competitors in this respect.
