

Viva / Rumba

An easy choice

WOOD

Let your heart decide

Manufacturing wooden floors is about managing nature's own design in the best way, since wood has such fantastic characteristics with natural beauty and variation. Whether you are looking for a calm, lively, dark, light, shiny or matt wooden floor, you will find we have it. And remember, each wooden floor is unique.

Light floors are available in maple, birch and ash, as well as oak and beech. The range also includes floors with stained and brushed surfaces which further highlights the beautiful grain and structure, which adds to the classic and exclusive feel. Viva is also available in a trendy design in grey and white stain as well as in dark, exotic wood species.

Viva Sucupira

Viva Cherry 3-strip

Viva

The Viva collection offers you plenty of choice in terms of wood species and expression. Viva is an 8.5 mm thick wooden floor. The thin construction means that in most cases Viva can be installed on top of an existing floor without the doors having to be cut or the thresholds changed. Viva cannot be re-sanded and is available as plank flooring or in a 2-strip or 3-strip design. The floors Viva Line and Viva Plank have bevelled edges all around.

Viva Line Oak Brushed

Viva Walnut 2-strip

Viva Ash Design Grey Plank

Our floors are pro-environment

As one of the world's leading floor manufacturers we have a big responsibility for the environment. And this is true for the whole chain, from wood species to production and into your home. Our raw material is renewable, we work with chemicals that are completely solvent-free and our wooden floors are fully recyclable.

In order to safeguard and guarantee our environmental policy, we have certified our production. ISO 9001, which guarantees the quality of production, forms the basis of our certification. But we are also environmentally certified in accordance with the ISO 14001 standard and also hold FSC certification. Environmental awareness is given high priority by Tarkett.

Rumba Oak Natural Brushed 3-strip

Rumba

Choose Rumba and you get a 13 mm thick wooden floor in a 3-strip design. The wear layer is 2.5 mm thick and means that – unlike Viva – you can re-sand the floor 2 – 3 times.

Optimum protection with Proteco

Tarkett not only manufacture one of the world's best wooden floors. We also provide our floors with one of the world's best protections against wear and tear and micro scratches. The floor surface has a lot to do with feel and shine and this is where Proteco come into its own.

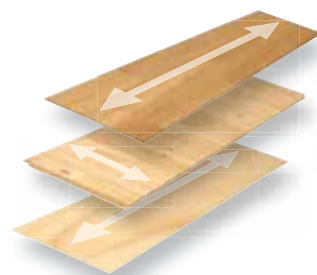

Proteco Lacquer is a double-hardened clear varnish and gives you a strong wooden floor that retains its feel of real wood.

Proteco Natura is a double-hardened matt varnish that retains the natural colour and feel of the wood, just like an oiled floor. You can be secure in the knowledge that Proteco – apart from being very hard-wearing and offering effective protection – is also kind on the environment.

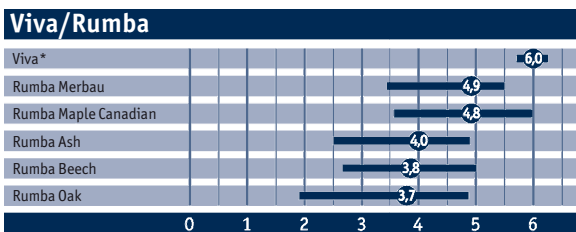

Quality even deep down

Wood is a living material that strives to maintain the same relative humidity as the ambient air. Wood swells with high humidity and shrinks when humidity is low. Our patented three-layer construction reduces wood movement by 70%. All Tarkett wooden floors are based on this principle, where the direction of the fibres in the various layers locks the natural movement of the wood. Yet another reason why you should choose a wooden floor from Tarkett.

How we measure the hardness of the wood

The Brinell test is a simple way of measuring the hardness of the wood.

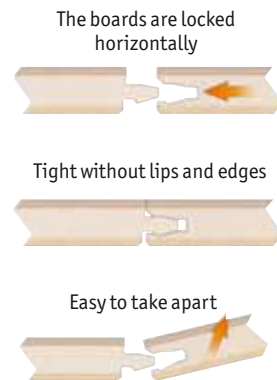

* Viva has a high Brinell value because the hard core of HDF absorbs the force of the Brinell-ball. Despite the fact that the technical reading is the same for all Viva floors, in practice it is possible to discern a slight difference in hardness within the Viva range depending on the type of wood used in the veneer layer.

Ultraloc Tarkett

It won't get easier!

Without the use of either glue or complicated tools you can fit the boards tightly together just by using a hammer and the tapping block. You'll get a perfect result without straining yourself.
